

## SENIOR FIRST AID CERTIFICATES

At any time the brothel is in operation, it is required that a staff member be present with a current Senior First Aid Certificate. Since a brothel must be personally supervised at all times approved managers and licensees are required to maintain current Senior First Aid Certificates.

Senior First Aid Certificates are normally valid for three years; however, the Cardio-pulmonary Resuscitation (CPR) component should be recertified annually. Therefore, it is important that for the Senior First Aid Certificate to be current, all competencies should be maintained as recommended by the certifying institution.

The PLA recognises the importance of practical senior first aid training and will only accept first aid certification from organisations providing such training.

Be aware that the provider of the training must be properly accredited. Such training can be obtained through a Registered Training Organisation (RTO) or an individual with formal accreditation as a trainer.
